Reference is made to the promulgation of the Regulation Issued under Section 9 of the Emergency Decree on Public Administration in Emergency Situations B.E. 2548 (2005) (No. 32) dated 28th August 2021. The present situation of the spread of Coronavirus Disease 2019 (COVID-19) was assessed by public health agencies and found that it is quite stable and tended to subside and become better. Although the number of patients with severe symptoms has still been at high level owing to the accumulation of infected cases from the past period, the number of new daily infected cases has gradually been decreasing and the number of patients who were treated and recovered has also been increasing. Such results have been derived from the integration and collaboration of agencies relating to public health, administration, security, volunteers and the public from all sectors in mobilizing all efforts for providing assistance and disease prevention to citizens.
